# How to Change Text (Text Placeholders)

1. Double Click on the Pre-Comp
2. Double Click on the text layer, then type in your text. I used Affair font
   (http://www.eaglefonts.com/affair-ttf-6160.htm) not sure if it is free.
   You can use a different / similar font style if you wish. :)
3. To Change font style, color, size, etc, use the Character Properties window

You can change the settings from here...(Render Queue window). By default I have set it to .mov format.
Once done, simply hit render.

If you have any concerns email me at dehannballesteros@gmail.com

Thanks! :)
De

# How to Change Photo (Photo Placeholders)

1. Double Click on the Pre-Comp
2. Click File>Import>File>(locate your file/media)>Then Click Open.
3. You will be able to see your imported media on your Project Tab list (3)
4. Next, drag that file (your imported media) to the preview window (4), You can adjust the size of your photo by first selecting your imported photo layer (5), then hit "s" on your keyboard, then play around with the values (6).
